

CLAY-DRILL™

POLYMER-BASED FLUID

CLAY-DRILL™ is a single sack dry product designed for short length HDD applications.

CLAY-DRILL polymer-based HDD fluid is designed to provide borehole stabilization, counteract the sticking tendencies of clay, and maximize clay/shale inhibition without the need for additional additives.

CLAY-DRILL™

POLYMER-BASED FLUID

BENEFITS

- ▶ Dry, Single Sack Product
- ▶ Mixes Easily at Low Shear
- ▶ Cost Effective Solution
- ▶ NSF Approved

APPLICATIONS

- ▶ Stabilizes Reactive Clay and Shale Formations
- ▶ Builds a Clay-Free Drilling Fluid
- ▶ Reduces or Eliminates Bit & Reamer Balling
- ▶ Minimizes Differential Sticking

ADVANTAGES

- ▶ Reduces the Number of Products On Site
- ▶ Single-Sack Product, no Additives Needed
- ▶ Effective at Low Concentrations
- ▶ Helps Inhibit Shale Swelling and Disintegration
