LEADING HDD PRODUCTS (Partial list)

	Product Trade Name	Product Description
DRILLING	AQUA-CLEAR® PFD	Liquid polymer dispersant
	BIO-BORE®	Clay-free, biodegradable drilling fluid
	BORE-GEL®	One-sack boring fluid system for use in HDD
	CLAY-DRILL™	Polymer-based HDD Fluid
	DIAMOND SEAL®	Water swellable crystalline dry polymer
	FUSE-IT®	Lost circulation material
	N-SEAL™	Acid soluble lost circulation material
	NO-SAG®	Biopolymer additive for enhancing carrying capacity of fluid
	PENETROL® DRY	Easily dispersed dry surfactant, NSF Std 60 Certified
	POLY-BORE™	PHPA dry polymer (high molecularweight)
	QUIK-BORE™	High yield boring fluid system
	QUIK MUD® D-50	PHPA liquid polymer dispersion, 50% active
	QUIK-TROL® GOLD LV	Low viscosity dry cellulosic polymer
GROUTING	Soda Ash	pH Adjustment / water softener
	BORE-GROUT™	Horizontal bentonite-based thermal grout

THE DIFFERENCE...  
OUR PRODUCT COMES WITH OUR PEOPLE

There are a number of BAROID IDP products used for HDD applications. Contact your local IDP retailer or give us a call today.

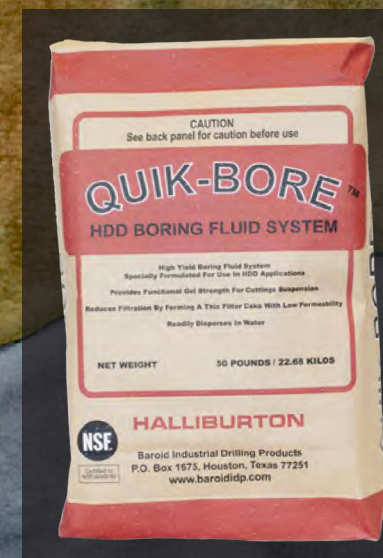

IDP

BAROID

ENGINEERED FLUID SOLUTIONS CUSTOMIZED TO MAXIMIZE BOREHOLE VALUE

HORIZONTAL  
DIRECTIONAL  
DRILLING

HIGH PERFORMANCE PRODUCTS AND SERVICE DELIVERED BY A SUPERIOR WORLDWIDE ORGANIZATION

**BAROID INDUSTRIAL DRILLING PRODUCTS (IDP)** offers a full range of drilling fluid and grouting products for different hole applications and geological conditions. The difference between a problem hole and a successful completion lies in IDP's extensive product line and the unparalleled expertise of our field support. We have the largest staff of highly qualified field service representatives in the industry. Coupled with the largest retail distribution network in the industry, IDP can and does deliver the solution!

Utilizing the latest polymer technologies, **CLAY-DRILL™** is designed specifically for the HDD market. CLAY-DRILL is a one-sack polymer system that provides superior clay inhibition for the most problematic geologies.

**IDP HDD PRODUCT LINE**

Continuing our tradition of offering industry-leading products, BAROID IDP offers the most productive and complete line of HDD products in the industry.

IDP's line of high-quality products designed specifically for the HDD market will allow you to complete more bores successfully, and attain higher profitability. Having been involved in the HDD market from the very beginning, IDP offers the highest quality products and support in the industry.

**CUSTOMER AND INDUSTRY TRAINING**

IDP has been involved in industry training for 50 continuous years. We implement training sessions ranging from industry-level to company-level and from one to five days.

Differentiated Customized Engineered Solutions		
Product	Function	Benefit
CLAY-DRILL™	One sack polymer boring fluid	Superior clay/shale inhibition for borehole stability
QUIK-TROL®GOLD LV	Minimal Fluid Loss	Formation stability, minimal viscosity increases
BORE-GEL®	One sack horizontal boring fluid system	Optimized fluid properties for borehole stability and cuttings transport
BORE-GROUT™	HDD Grouting	Mixed and pumped through HDD equipment
AQUA-CLEAR® PFD	Clay Slurry Flowability	Minimize "frac-outs" and volume of fluid required

**THE BAROID IDP DIFFERENCE**

- Customer service providing technical and logistical expertise
- Largest staff of field service reps to work onsite with contractors
- The industries largest retail distribution network
- Extensive range of NSF Standard 60 certified products
- Fifty continuous years of training the industry
- Dedicated staff to ensure proper and timely order processing and material availability, and to coordinate logistics and on-time/accurate billing
